STOCK ANALYSIS

At the end of each month, management can conduct a **structured stock status analysis** to identify **overstocked** and **understocked** items and take corrective action.

To effectively conduct the **monthly stock status analysis**, management must ensure that accurate data is extracted from both **ORDERSTREAM** and the **VIP database**, as these systems contain most of the required inventory information.

To be able to analyze stock, the following data must be collected for each SKU:

- Beginning stock
- Purchases during the month
- Sales during the month
- Ending stock
- Average monthly sales (last 3–6 months)
- Lead time (supplier delivery time)
- Reorder level
- Date last received
- Sales Budget

The collected information and the calculated measures must feed an analytical tool for dashboards and reports.

Source Tables:

- **INVENT** → Inventory Table
- **DAILYT** → Daily Sales Invoice Table
- **ITEMT (Product Table)** → product-related dimensions
- **PODTLT** → Purchase Order Detail for last received date
- **VENDOR_CONSTRAINTS** → Vendor Constraints Downloaded from ORDERSTREAM
- **SALES BUDGET** → Sales Budget download from DI

INVENT (INVENTORY TABLE): Important fields in INVENT Table:

INVENT	
IYWHSE	Warehouse
IYITEM	Item
IYONHA	On Hand
IYSAC	Sales Current

CALCULATED FIELDS:

From the above-mentioned tables and fields, the following calculated fields (Measures) must be created:

STOCK ANALYSIS	**Source**	**Formula**
IDEAL Month of Stock	ORDERSTREAM	From Spreadsheet Item_OrderVendor
Current OH in UNITS	INVENT	Totalise OH warehouse 11010, 11020, 11060

ON ORDER in UNITS	INVENT	Totalise ON ORDER warehouse 11010, 11020, 11060
ON ORDER ETA	PODTLT	POLIST2 from EVIP
YTD Sales in UNITS	DAILYT	Totalise Sales from 01/01 till Closed Month
Monthly Sales in UNITS	DAILYT	Calculate Monthly Average Sales in Units: (((AVG M1/M2/M3/M4) * 8) + ((AVG M5/M6/M7/M8) *1) + ((AVG M9/M10/M11/M12)*1))/10 Excl Nov / Dec. **This calculation might change now that we have direct access to the database and ORDERSTREAM is being used for purchases.**
IDEAL STOCK in UNITS	Calculated	Monthly Sales in Units * Minimum Month of Stock
Overstock in Units (Excl on Order)	Calculated	(Current OH in UNITS) - (IDEAL STOCK in UNITS)
Overstock in UNITS Incl Orders	Calculated	(Current OH in UNITS) + (ON ORDER in UNITS) - (IDEAL STOCK in UNITS)
MONTHS of STOCK on On Hand	Calculated	(ON HAND) / (Monthly Sales in UNITS)
YEARS of STOCK on ON HAND	Calculated	MONTHs OF STOCK on ON HAND /12
MONTHS of STOCK on On Hand + On Order	Calculated	(ON HAND + ON ORDER) / (Monthly Sales in UNITS)
MONTHS of OVERSTOCK on ON HAND	Calculated	(MONTHS of OVERSTOCK on On Hand)-(IDEAL Month of Stock
MONTHS of OVERSTOCK on (ON HAND + ON ORDER)	Calculated	(MONTHS of OVERSTOCK on On Hand + On Order) - (IDEAL Month of Stock)
TOTAL BUDGETED UNITS	Sales Budget	Field "Budgeted Units" per year

YTD BUDGETED UNITS	Sales Budget	TOTAL BUDGETED UNITS January till Corresponding Month
TOTAL BUDGETED SALES (YEAR)	Sales Budget	FIELD "BUDGETED SALES" per YEAR
TOTAL BUDGETED SALES YTD	Sales Budget	FIELD "BUDGETED SALES" January till Corresponding Month
TOTAL BUDGETED COST (YEAR)	Sales Budget	FIELD "BUDGETED COST" per YEAR
TOTAL BUDGETED COST YTD	Sales Budget	FIELD "BUDGETED COST" January till Corresponding Month
OVER UNDER PERFORMANCE	Calculated	(YTD Sales in UNITS) - (YTD BUDGETED UNITS)
INVENTORY VALUE	RANKER_952	((OH 11010) * Cost 11010) + ((OH_11020) * Cost 11010) + ((OH 11060) * COST 11060)
ITEM FALLS in FIRST 80% of TOTAL INV VALUE	Calculated	Calculate Inventory Value that falls in the first 80% of total Inventory Value
ITEM SALES PARETO	Calculated	Calculate First, second and third pareto and items no sales in current year
Value on Order	RANKER_952	((ON_ORDER 11010) * Cost 11010) + ((ON_ORDER_11020) * Cost 11010) + ((ON_ORDER11060) * COST 11060)
TOTAL INVENTORY VALUE	Calculated	INVENTORY VALUE + VALUE ON ORDER
AVERAGE COST PER CASE	Calculated	INVENTORY VALUE / CURRENT OH in Units
Ideal Stock in ANG	Calculated	IDEAL STOCK in UNITS * AVERAGE COST PER CASE
Budgetted IDEAL STOCK in ANG	Calculated	((YEAR BUDGETTED COST)/12) * IDEAL STOCK in Units
OverStock Excl on Order in ANG	Calculated	Inventory Value - Ideal Stock in ANG

Overstock Incl on Order in ANG:	Calculated	((INVENTORY VALUE) + (Value on Order)) - (Ideal Stock in ANG)
AVERAGE MARGIN DURING CURRENT YEAR	Calculated	Calculate margin per SKU and calculate Average
Expected Monthly Sales in ANG	Calculated	FIELD "BUDGETED SALES" per YEAR / 12
Months of Stock Incl On Order on Value	Calculated	TOTAL INVENTORY VALUE / (YEAR BUDGETTED COST / 12)
Months of Overstock Ioncl On Order on Value	Calculated	TOTAL OVERSTOCK VALUE / (YEAR BUDGETTED COST / 12)
Daily Rate opf Sales	Calculated	AVERAGE SALES / 21.67
Last Receipt Date of Order	PODTLT	Last Receipt Date
QTY Last Received	PODTLT	Last Receipt Qty
Item obsolete?	Selected	Need proper criteria
Sales in units Current Year -3	Calculated	Sum of units current year -3
Sales in units Current Year -2	Calculated	Sum of units current year -2
Sales in units Current Year -1	Calculated	Sum of units current year -1
Sales in units Current Year	Calculated	Sum of units current year
Sales in units Current Year -3 till Current Year	Calculated	Sum Sales in units Current Year -3 till current year
Sales in units DRS Current Year -3	Calculated	Sum of units current year -3 / Total days of sales

Sales in units DRS Current Year -2	Calculated	Sum of units current year -2 / Total days of sales
Sales in units DRS Current Year -1	Calculated	Sum of units current year -1 / Total days of sales
Sales in units DRS Current Year	Calculated	Sum of units current year / Total days of sales
Sales Budget in units per Day	Calculated	Sales Budget in units per Year / total days of sales
Budget vs Sales Current year -1	Calculated	
Stock 11060	Invent	Calculated
Stock 11060 + 11020	Invent	Calculated
Cost Duties	RANKER_99T	SUM of Duties
Value Duties in Inventory	Calculated	
Average all discount% in 2025	Calculated	
Conclusion GMROI	Selection	
Conclusion Inventory turnover	Selection	
Overall COnclusion	Manual Input	
Days before arrival Order	Calculated	Date Difference Stock Start Date till ON ORDER ETA (09/01/2025) MONTH END DATE

Months before arrival order	Calculated	Days Before arrival Order /30
Unit Sales before arrival Order	Calculated	Months before arrival Order * Avergae Monthly Sales in units
TOTAL On Hand at arrival of Order	Calculated	Total on Hand + On Order - Units sales before arrival of Order
OVERSTOCK at Arrival of Order	Calculated	TOTAL OH at Arrival of Order - IDEAL STOCK in UNITS
TOTAL MONTHS before IDEAL STOCK	Calculated	Overstock at Arrival of Order / Monthly Sales
